MESSAGE

I would like to extend my compliments to the Organising Committee of the 12th MOH-AMM Scientific Meeting 2017 for holding this scientific discourse with a very important and currently relevant theme of **“Battling Non-Communicable Diseases - New Strategies”**.

Non-Communicable Diseases (NCDs) are a significant and growing global public health problem affecting all countries irrespective of socio-economic status. Malaysia is not spared from this increasing burden of NCDs. The annual mortality rate per 100,000 people from NCDs in Malaysia has increased by 16.7% since 1990, with an average of 0.7% per annum. From only about 40% in 1990, NCDs now account for over 70% of mortalities in the country. The prevalence of NCD risk factors also continues to rise in Malaysia, as evidenced by the results of the National Health and Morbidity Surveys over the years.

The NCD situation in Malaysia is like that of an epidemic and must be dealt with like any Public Health Emergency. The Ministry of Health has taken the lead in formulating the National Strategic Plan for Non-Communicable Diseases (NSP-NCD) 2016-2025, following up from the earlier NSP-NCD 2010-2014, to combat NCDs where the risk factors are already known and well described. The emphasis on the whole-of-government and whole-of-society approach to NCDs is important as health is not only MOH’s responsibility but also the responsibility of everyone, from organisational, community and individual. It relies on the support of all stakeholders.

The Ministry of Health is committed to reducing the burden of NCDs through policy interventions as well as empowering communities and individuals to take ownership of their health. I hope this scientific meeting will serve as another platform for healthcare practitioners across various fields to share their expertise and experiences, and further contribute to the knowledge base on developing and implementing effective and sustainable NCD interventions in Malaysia.

YB Datuk Seri Dr S Subramaniam

Minister of Health Malaysia

MESSAGE

It gives me enormous pleasure to write this message for the 12th Ministry of Health-Academy of Medicine of Malaysia Scientific Meeting incorporating the 20th Scientific Seminar of the National Health Institutes. This year, the 5th International Clinical Conference in Emergency Medicine (ICCEM) 2017 will be held in conjunction with the MOH-AMM scientific meeting.

The MOH-AMM Biennial Scientific Meeting, a collaborative effort of the Academy of Medicine of Malaysia and the Ministry of Health, has gained substantial prominence over the years. It has become a significant forum where critical healthcare issues facing the community are addressed. This year's theme 'Battling NCD - New Strategies' is indeed very crucial. Non-communicable diseases are the leading causes of death worldwide, killing ever more people each year. In Malaysia, it is the main cause of premature deaths among adults. NCD has become a significant public health concern and has put a tremendous strain on our healthcare system. Health professionals in collaboration with relevant stakeholders must adopt appropriate strategies and preventive measures to tackle the burden of NCDs.

I wish everyone a fruitful and memorable experience in this Scientific Meeting.

MESSAGE

As the Organising Chair and Co-Chair, it is a great honour for us to pen a few words and express our greatest gratitude to the Honourable Datuk Seri Dr S Subramaniam, Minister of Health Malaysia, for agreeing to officiate the Opening Ceremony of the 12th MOH-AMM Scientific Meeting incorporating the 20th NIH Scientific Seminar and the 5th International Clinical Conference on Emergency Medicine 2017. It is not an easy task to organize a conference, let alone combining three important events at one go.

The theme of the conference is appropriate and timely : Battling NCD - New Strategies. Malaysia is not alone in facing the impact of NCDs with its complications in a growing ageing population. We are fortunate to have with us distinguished international and local speakers who will share with us their knowledge and wisdom in tackling this economically burden disease. In this era of digitalisation, tackling this challenge will require innovations and new strategies.

With that, we would like to express our sincere appreciation to all individuals and sponsors for making this conference a success.

Thank you very much.

14TH TUNKU ABDUL RAHMAN PUTRA LECTURE

“The Time Has Come”

Datuk Dr Yeoh Poh Hong
Citation by Dr Milton Lum Siew Wah

Datuk Dr Yeoh Poh Hong had his education at the Gajah Berang and Malacca High Schools, and graduated from the University of Malaya in 1973. After his housemanship, he received his commission as a Captain in the Malaysian Armed Forces and was the most outstanding officer in 1974.

He obtained the Fellowship of the Royal College of Surgeons Edinburgh in 1978 and the Master of Orthopaedic Surgery from Liverpool University in 1980, by examination. Upon his return, he was appointed Associate Professor at the Department of Orthopaedics, National University of Malaysia and Head of the Accident & Emergency Department of Hospital Kuala Lumpur. Since 1983, he has been a Consultant at the Pantai Hospital, Kuala Lumpur.

Poh Hong has held leadership positions in various medical organizations throughout his career, having been President of the Malaysian Medical Association, President of the College of Surgeons, President of the Malaysian Orthopaedic Association, President of the Alumni Association of the King Edward VII College of Medicine & Faculties of Medicine of the Universities of Malaya & Singapore and Chairman of the Board of Trustees of the Malaysian Medical Association Foundation.

He served 27 years as an elected member of the Malaysian Medical Council and contributed substantially to the MMC Committees for Registration, Specialist Register, Amendments to the Medical Act and Ethics. He had a keen interest in medical education and was a member of the Court of the National University of Malaysia, Coordinating Council on Postgraduate Medical Education, Higher Education Board, Ministry of Education and the Joint Technical Committee for Accreditation of Medical Schools of the National Accreditation Council and later the Malaysian Qualification Agency.

Poh Hong became a Member of the Academy of Medicine in 1981, a Fellow in 1996 and served as its Master from 1998 to 2002.

That he was held in high regard was exemplified by the King's award of the PJN to him in 1997 and his appointment to the Royal Commission of Inquiry into Dato Seri Anwar Ibrahim's matter in 1998 together with former Chief Justice Anwar Zainal Abidin and former Court of Appeal Judge Mahadev Shankar.

Poh Hong has been recognized internationally with the award of honorary fellowships from the Colleges of Surgeons of South Africa and the American College of Physicians and fellowships of the Royal Colleges of England and Glasgow, and the Academy of Medicine, Singapore.

He has been a Trustee of the Ghandi Memorial Trust since 2008 and a member of the Board of Governors of the International Medical University since 2013.

The Tunku's principles for nation-building were inclusiveness, integrity, compassion and respect for everyone which are the same as the tenets of Medicine. These principles are particularly relevant today with the current focus on miniscule differences and not the considerably more numerous similarities. It is fitting that the Tunku's eponymous lecture is given by Poh Hong whose contributions to Malaysian Medicine has been substantial.

It is an honour and a privilege for me to present Datuk Dr Yeoh Poh Hong as a worthy recipient of the award of the 2017 Tunku Abdul Rahman Putra Lecturer.
